

 **AZILIN**  
All kinds of sportswear

The importance of clothing, has made our industrial company use high quality materials such as polyester, spandex, microfiber and cotton in the production of sportswear.

specifications of the main fabrics used in the production of Azilin trading company:

#### Antibacterial

- highly resistant against sunlight
- Impermeable against air and rain
- Absorption of body moisture
- Elastic fibers making stretching and moving easier

Our company strives to produce and export high quality sportswear by carefully selecting fabrics and using modern techniques such as double -layer or flat sewing, accurate cuts and use of attractive colors.

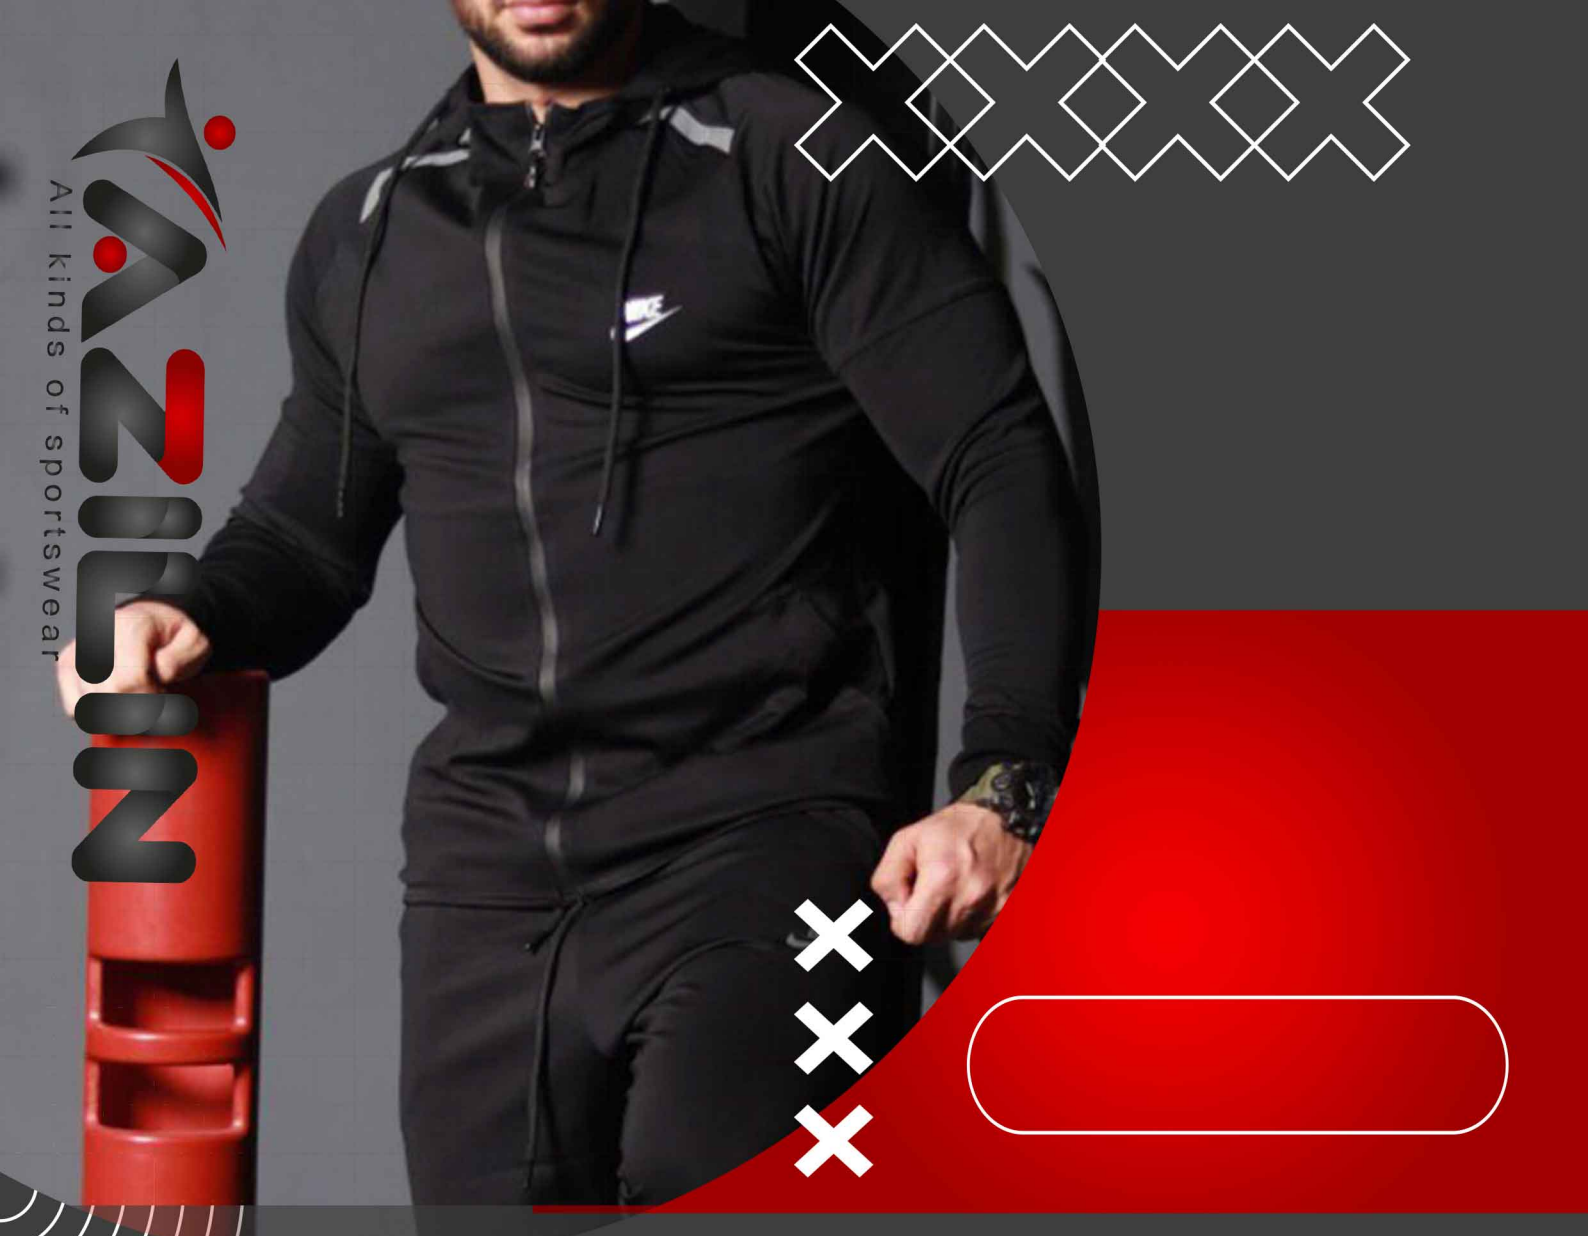

Our product improves consumer performance with technical innovations and also have resistance against performing different movements. The aforementioned specifications have increased our exports and customers.

## Products

### Sports sets:

- Types of men's sports sets: These clothes can be used both during exercise and for everyday use. The material of these clothes conveys a proper air flow to your body and prevents excessive sweating of the body. These sets include sweatshirts, T-shirts, warm pants and trousers.

- Types of women's sports sets: One of the most common clothes among women are these sports sets and they are very popular. These sets are very comfortable and stylish, and by wearing them, you can easily perform sports movements. They are simple and patterned in different colors and fabric designs.

- Types of children's sports sets (girls 'and boys' sets): The height of the pants of these sets is 50 to 90 cm and they are suitable for the age group of 4 to 12 years. Produced in cheerful and diverse colors as well as in patterned models.

## Sports Pants

- **Types of sports pants:** These pants are very popular and their sewing is clean and well-ordered. With excellent, exact sizes and with material that can prevent sweating and as well as bad odor during exercise.
- **Types of slash pants:** They are the most stylish and appropriate type of pants that can be worn to perform all sports activities conveniently. Its waist is usually slash and straps that can be adjusted to the size of the waist. Their ankles are simple and, in some models, they have straps.

## Different sportswear

**Football:** Includes a long or short sleeve T-shirt, shorts, socks and two leg protectors. You can order these clothes with your own name and number.

**Basketball:** These clothes include a t-shirt and loose shirts that are sold in different sizes depending on your height and weight. You can order these clothes with your own name and number.

**Volleyball:** includes a set of T-shirts and shorts, with an elastic waist and shorts and can be closed with strings. You can order these clothes with your own name and number.

**Swimming:** These clothes have a very high diversity. In some male models, both upper and lower body are covered, and in some models, it is only in the form of men's shorts. Women's models also include one-piece or two-piece clothes that are available in different designs and models.

**Mountaineering:** In spring, autumn and winter, you should wear special clothes for that season. Mountaineering costumes consist of three layers. The first layer plays the role of antiperspirant, the second layer is ordinary clothes that are used and the third layer is clothes that protect you against cold and rain.

**Gymnastics:** These clothes should be perfectly fit so as not to disturb during sports movements. The best clothes are leotards or double-breasted, which are sleeveless, short-sleeved and long-sleeved. Leotards are one-piece and tight-fitting clothes that completely cover the upper body and, in most models, do not cover the individual's feet. Can be ordered in other models such as T-shirts and shorts, T-shirts and pants, etc.

**Cycling:** Cycling clothes are flexible and are very compatible with the style of bending on the handlebars and riding. These clothes are perfectly fit and you feel comfortable while cycling. One type includes a T-shirt, shorts, pants or shorts, gloves and a tie, and the other type is complete. Available in both male and female models.

**Wrestling:** Wrestling clothes are the authorized clothes for wrestlers in competitions. Wrestling clothes include long and short clothes. long means larger around the neck and armpits, but both are above the knee. They are produced in different styles, fabrics and sizes.

**Martial arts:** include taekwondo, karate, wushu, judo, etc. The upper and lower body are separate and distinct from each other. These clothes are light and it is possible to fight easily and comfortably with it.

## Fan's clothes

Includes a variety of kits and clothes of foreign and national teams such as:

- Kit of famous national and European football teams
- Middle East national team kits
- NBA Basketball Team Kit

The different types of sportswear in design, color and model can fulfil the different tastes of people. This diversity has increased the export of our company. Our designers also use modern designs and customer's desired designs for products.

## packaging

Plastic with flexible, sewing, and printability is the best material for various packages. The categories can be zipper, sticky, hooked, and buttoned and based on customer's request in clear, opaque color and back shell. This company uses adhesive plastic for wholesale products. This type of plastic can be used quickly and easily due to the presence of adhesive on this edge. Finally, it is necessary to mention that sportswear is packaged in cartons of different sizes.

At the end, the sports clothes are placed in cartons of different sizes and sent to the customers.
